

BLACK MAGIC™ MAGIC

Product Number:

11978

Package:

11978 / 4/1-gallon jugs/case

Black Magic™ Soldering Pickle

INTENDED USES:

A non-acid pickle for all metals. No fumes, no corrosion, and safe use at the bench. Long lasting, and not adversely affected by steel. Comes shipped as a **Ready-To-Use** liquid soldering pickle in a 1-gallon-sized bottle.

USAGE INSTRUCTION:

Black Magic comes as a biodegradable **Ready-To-Use** liquid soldering pickle in a 1-gallon-sized bottle. There is no need to add water. Pour directly into pickle pot and heat. Unlike other pickling solutions that cause a reaction with steel tweezers, **Black Magic** is specially formulated so that steel tweezers can be used. If the liquid begins evaporating in the pickle pot, more of the **RTU Black Magic** can be added to increase overall strength. When the product loses its strength and noticeably stops working effectively, empty the pickle pot and start fresh with new product. On heavy blacked out items soak then steam to remove excess black.
