

BORICTM ACID POWDER

Product Number:

11955 - 16 ounce jar

Package:

11955/ 12 jars per case

Magic Boric Acid PowderTM

INTENDED USES:

High-grade, super-fine boric acid powder. Use as high-grade flux and deoxidizing agent. You can make a paste to use as a flux. When mixed with denatured alcohol Magic Boric Acid Powder can be used as a glaze.

USAGE INSTRUCTION:

Used as a glaze or flux:

Mix with distilled water or if possible denatured alcohol to form a paste. Dip or pour this solution over the piece to protect and light with a flame. The alcohol will be burned off leaving behind piece.

Melting of precious metals:

When added during the melting of gold and silver it helps to dissolve oxides and other impurities and produce a fluid borate slag that collects on the surface of the molten metal. This slag is periodically removed, by the use of carbon - graphite or clay rod items; soak, then steam to remove excess black.

PROPERTIES

State:	Solid
Color/ Form:	White Powder
Scent:	Odorless
Solubility:(In water)	< 5%
pH:	5.1 (1% Solution)
Shelf Life:	2 years (Normal indoor condition 70°)
Hazard Rating:	HMIS 2 0 0 E
