MAGIC GREEN CONCENTRATED ULTRASONIC CLEANER

Industry Leader
**Used by more professional jewelers than
any other ultrasonic cleaner.**

INTENDED USES:

A non-ammoniated concentrated ultrasonic jewelry cleaner that is especially useful for removing tightly adhered contaminants from intricate areas found in most jewelry pieces. Formulated to remove specific contaminants unique to jewelry. These include dust, dirt, oil, grease, pigments, oils, lotions, skin, food, and contaminants used in the jewelry-making process like flux agents, and polishing compounds.

With the industry's first color mixing indicator, there is no need to measure or worry about getting the correct dilution. Easily see if you have the correct mixture by simply matching the color on the label to achieve the correct dilution ratio, if the color is darker than the label add water if the color is lighter than the label add the product, no need to measure.

ALTERNATE USAGE INSTRUCTIONS:

Start mixing 1 ounce of **MAGIC GREEN** with 1 gallon of water, up to 3 ounces per gallon. The stronger the mix the faster it cleans. For best results use warm to hot distilled water when mixing solution.

Please make sure to read and understand the product label and Safety Data Sheet and follow all directions, precautionary and first aid statements on product label. Safety Data Sheets (SDS) are available from Magic Cast Products, or an authorized distributor.
