

# MAGIC™ OVERRIDE

## Product Number:

11330 - 16 ounce jar

## Package:

11330/ 12 jars per case

## Magic Override™ Neutralizing Powder

### INTENDED USES:

This product is designed to be used with Magic Pickle as a neutralizing compound. After soaking jewelry in a pickle pot, use Magic Override to neutralize acids that are still present on jewelry.

### MIXING INSTRUCTION:

Use as a neutralizing rinse:

Mix one tablespoon with 12 to 16 ounces of water, stir until powder dissolves in water. Remove jewelry from pickle pot and place in Magic Override and water solution. Remove from solution and rinse with water, then steam.

### Neutralizing pickle pot solution for disposal:

Add Magic Override to the pickle pot liquid you are disposing of. We suggest a 1: 1 ratio with the amount of Magic Pickle you charged your pot with originally. (If 2 tablespoons were used of Black Magic, then use 1 table spoon of Magic Override)

*Note: \*When adding Magic Override be sure you have enough space in the container to hold the current amount plus ½ more in volume. When mixed, Black Magic and Magic Override have a chemical reaction that results in bubbles throughout the mixture and the volume increases about half the volume of it's original mixture will become calm (There will still be some bubbling). Time frame for neutralization should be between 5 to 7 minutes, then go to the city sewer.*
