

MAGICTM CLEAN STEAM

Product Number:

11995 - 16 ounce bottle

Package:

11995/ 12 bottles per case

Magic Clean SteamTM

INTENDED USES:

Formulated to blend with the water inside your steamer, preventing the startup of rust in the tank. Magic Clean Steam will allow you to get more life out of your machine by keeping the rust process to start on tank walls. It will reduce the need for monthly blowouts (instructions most steamer manufacturers suggest), or the need to keep your tank as full as possible.

Why rust is in my steam machine:

All tanks are made from metal, as you use the steamer the water level in the tank drops that area of the tank is now exposed to air.

Water has minerals in it some have a higher content than other areas in the world. When hard water is introduced to high temperatures and pressure these minerals begin to group together and fall out.

Why should I use Clean Steam?

Most steamer companies mandate that you keep your steamer full always, this is the reason. Keeping your tank as full as possible removes the air creating rust. Adding Magic Clean Steam tackles both of these issues by mixing with the water and not allowing the minerals to group together, and by layering the inside of the steamer preventing rust from beginning.
